SUMMARY

Computer Science and Engineering student with hands-on software development experience building full-stack web applications independently using object-oriented design, SDLC, RESTful APIs, and both relational and NoSQL databases. Proactive and curious engineer who has shipped multiple end-to-end projects—from authentication systems to payment integrations—demonstrating critical thinking and the drive to learn new technologies quickly. Eager to contribute clean, well-documented code at scale in a collaborative, cross-functional engineering environment.

EDUCATION

Karmaveer Dadasaheb Kannamwar Engineering College

2023 – 2027

Computer Science and Engineering - CGPA - 7.1

Nagpur, Maharashtra

COURSEWORK

- Data Structures & Algorithms
- Operating Systems
- Database Management System (DBMS)
- Web Development
- OOPS Concept

EXPERIENCE

Web Development (Frontend) Intern 

Jan 2025 – Mar 2025

Infosynch Software Solution Pvt. Ltd.

Nagpur, India

- Collaborated cross-functionally with senior developers in Agile workflows, participating in code reviews and proactively iterating on feedback to ship higher-quality code.
- Built and maintained web application features using HTML, CSS, and JavaScript, independently owning new feature development and debugging code defects.
- Applied object-oriented design principles and UI/UX best practices to develop responsive, well-documented frontend components adaptable across environments.
- Used Git for version control, managing branches and pull requests across development and test environments to maintain clean deployment workflows.

PROJECTS

PORTFOLIO  | [React.js](#), [Tailwind CSS](#), [Express.js](#), [Web3Forms](#)

Jan 2026

- Designed and developed a personal portfolio site using React.js, Tailwind CSS, and Express.js with Web3Forms integration for contact functionality, showcasing software development projects with responsive design...
- [Live site here](#)

Smart Canteen System  | [React.js](#), [Tailwind CSS](#), [Express.js](#), [MongoDB](#), [Razorpay API key](#)

Apr 2026

- Independently designed and shipped a full-stack canteen management application using the MERN stack, implementing online food ordering, real-time order tracking, and user authentication across a multi-tiered architecture..
- Built RESTful APIs with Express.js and MongoDB to handle concurrent order processing and automated email notifications via Nodemailer, sending real-time alerts when orders are ready for pickup..
- Implemented role-based access control (User/Admin) using JWT and object-oriented design patterns, enabling secure login, menu management, and order status updates..
- Integrated Razorpay test payment gateway for secure online payments along with Cash on Delivery support, validating functionality through automated testing with Postman..
- [Live site here](#)

ORGAN-I-ZATION  | [React.js](#), [Tailwind CSS](#), [Express.js](#), [MongoDB](#)

Nov 2025

- Built a full-stack Organ Donation web application end-to-end using React.js and Express.js, designing a responsive UI for submitting donor forms and managing sensitive user data with care. .
- Implemented secure authentication and authorization with JWT Tokens, enabling protected routes and rolebased user access across the application .
- Developed RESTful APIs with Express.js and MongoDB to handle user data, donor forms, and dashboard operations with clean, well-documented code following software development best practices..
- [Live site here](#)

TECHNICAL SKILLS

Languages: Java, C, JavaScript, SQL, python

Frontend Development: React.js, HTML, CSS, Tailwind CSS, Angularjs

Backend Development: Node.js, Express.js, MongoDB, RDBMS

Tools and Platform: Git, GitHub, Postman, Unit Testing, VSCode, AWS

Soft Skills: Strong analytical and problem-solving skills, development troubleshooting Team Work, Good English written and spoken

CERTIFICATIONS

- Complete web Development - Udemy [!\[\]\(c6a8736a601a632e2c96605cf66055ed_img.jpg\)](#)
